Education

B.E. in CSE (AIML)

November 2022 – Present

VIVA Institute of Technology, Mumbai University, Maharashtra

Higher Secondary Certificate(HSC)

March 2021 – May 2022

Abhinav Vidya Mandir, Bhayandar, Maharashtra

Skills

Languages: Python, R, SQL, JavaScript, Solidity, Flutter

Libraries: NumPy, Pandas, Matplotlib, TensorFlow, LangChain

Frameworks: Flask, React Native, Expo, PySpark, Hyperledger Fabric

Tools & Technologies: Microsoft Fabric, Power BI, Lakehouse Architecture, GitHub, JIRA, Vercel, Deployment & Hosting

Experience

Larsen & Toubro

December 2025 – January 2026

Data Scientist

- Developed a predictive model to estimate manufacturing clearance time in the Energy & Hydrocarbon division at Larsen & Toubro using Python and TensorFlow.
- Processed and analyzed large datasets using Microsoft Fabric, PySpark, SQL, Pandas, and NumPy for data cleaning and feature engineering.
- Trained and optimized machine learning models to improve prediction accuracy and support manufacturing process planning.
- Built Power BI dashboards to visualize model predictions and operational insights for stakeholders.

Ashwa LLP Enterprises

June 2025 – November 2025

Software Engineer

- Gained hands-on experience in **Natural Language Processing (NLP)** by processing multilingual PDF data and implementing text extraction, embeddings, and semantic search for AI solutions. Devised a customized recursion algorithm to extend the functionality of the current environment to a multi-robot and multi-system environment.
- Built and optimized a document classification system by transitioning from MobileNet to OCR-based pipelines with Ollama and Vision API integration.
- Developed scalable pipelines for handling large-scale unstructured documents and improving document processing efficiency.

Edulyt India

January 2024 – March 2024

Data Analyst

- Performed data preprocessing including missing value treatment, outlier detection, and normalization to prepare datasets for analysis.
- Conducted exploratory data analysis and built visual dashboards using charts and plots to communicate insights to stakeholders.

Projects

AI Recruitment Agent

Tech Stack: Python, NLP, Machine Learning, LangChain, Vector Embeddings, Batch Processing

- Designed and developed an AI-powered recruitment automation system to streamline resume screening and candidate evaluation.
- Implemented vector-based semantic matching by converting job descriptions and resumes into embeddings for intelligent candidate shortlisting.
- Built automated assessment workflows including AI-based voice interviews, MCQ tests, and written evaluations with score aggregation for final candidate selection.

CosmoGenius Mobile Application

Tech Stack: React Native (Expo), Firebase, Supabase, Gemini API, Face++ API

- Developed a cross-platform skincare mobile application with features such as face scan analysis, skin condition detection quiz, routine generator, chatbot, reminders, and product recommendations.
- Integrated **Face++ API** for facial skin analysis and implemented sorting algorithms and mathematical scoring for personalized skincare recommendations.
- Used Firebase and Supabase for authentication, database management, and real-time backend services.
